

IR-NP-NLH-018
NLH 2013 Interim Rates Application

Page 1 of 1

1 Q. The proposed interim wholesale rate provides an incentive to Newfoundland Power
2 to incur costs of up to \$109.44 per kW (i.e., \$9.12 per kW times 12 months) to
3 reduce its peak demand during the 2013/2014 winter season. If a lower demand
4 charge is implemented at the conclusion of the General Rate Application, is Hydro
5 proposing to revise its billing to Newfoundland Power for 2014 to reflect the lower
6 demand charge?

7

8

9 A. Yes, upon final order of the Board.
