

IR-PUB-NLH-038
NLH 2013 Interim Rates Application

Page 1 of 1

1 Q. Have there been any changes to the information proposed in the 2013 General Rate
2 Application and the Interim Rates Application that would cause there to be changes
3 in the table provided in the response to IR-PUB-NLH-37? If so, provide a revised
4 table showing the changes and explaining why these have occurred.

5

6

7 A. As indicated in the response to IR-PUB-NLH-037, the requested table was not
8 provided. As Hydro is proposing rates for the Industrial Customers, rather than
9 applying a percentage to calculate revenue, and those proposed rates are to be
10 effective January 2014, the 2013 billing determinants are no longer meaningful.
