

1    Q.    Reference: General Rate Application filed July 30, Evidence, Section 6.0  
2           Should the Board approve a regulatory deferral and recovery mechanism instead of  
3           interim rates, is it Hydro's intention to have a separate account to recover costs  
4           from each individual industrial customer?

5

6

7    A.    No. A deferral and recovery mechanism would be proposed to be at the customer  
8           class level rather than individual customer level, with funding to come from the RSP  
9           Surplus.
