

1     Q.     Reference: Interim Rate Application filed November 18, 2013, RFI V-NLH-015  
2           Using the amount provided in V-NLH-14 for the balance in the RSP Surplus that is  
3           forecasted to be owing to Hydro on September 1, 2016 if the Board orders a thirty  
4           six month phase in period, using forecast demand and energy post September 1,  
5           2016, please advise the amount of the balance owing at the end of the phase in  
6           period that each of the industrial customers will repay.

7  
8  
9     A.     As outlined in Section F of the RSP Rules filed as Schedule B to Hydro's Interim Rates  
10           Application, the amount of \$5,549,214 (provided in the response to IR-V-NLH-024),  
11           which should be noted is a forecast amount, would be added to the Industrial  
12           Customer RSP balance effective September 1, 2016 to form part of the overall RSP  
13           balance owing to/from Hydro. The approximate amounts recoverable by each  
14           Industrial Customer are provided in the response to IR-V-NLH-026, but will depend  
15           upon actual load in 2016.
