

1 Q. Please provide an updated analysis similar to IR-V-NLH-023 from Hydro's first  
2 Interim Rate application for industrial customers as a group and NP.

3

4

5 A. In the analysis provided in Hydro's response to IR-V-NLH-023, the estimated  
6 customer impacts of concluding the phase-in on September 1, 2016 could be  
7 provided as the proposed phase-in approach was based upon the target base rate  
8 included in the GRA.

9

10 The target base rate for completion of the phase-in is currently unknown because  
11 Hydro will be filing an amended application in the fall of 2014, which will include  
12 the target base rate. Therefore, the analysis requested cannot be provided.
