

1 Q. Please provide the date when the 8x2 MW diesel black start capability was in
2 service and the date when it no longer was necessary due to completion of the new
3 CT.

4

5

6 A. The eight x 2 MW diesel blackstart capability was placed in service on July 25, 2014.
7 This blackstart capability is currently in service and will remain in service until the
8 blackstart capability of the new CT has been proven. The commissioning of the new
9 CT equipment required to provide this capability is currently ongoing and is
10 expected to be completed in the summer of 2015.
