1 **Q.** ***Re: Personal Computer Infrastructure, Schedule B, Pages 83, 84 and 85 of 93***
2
3 **Please provide the rationale for concluding that both PCs and printers need to be**
4 **replaced at the same time.**
5
6 A. PCs and printers are not replaced at the same time.
7
8 As stated in Schedule B, page 83 of 93, printers are included as part of the Personal
9 Computer Infrastructure project as they are similar in nature and justification. The
10 replacement of printers is not dependent upon the replacement of PCs.
11
12 Laptop PCs are replaced on 3 to 4 year cycles and desktop PCs are replaced on 4 to 5
13 year cycles.[1] The printers included for replacement in 2013 will have between 12 and 14
14 years in service.[2]
