IN THE MATTER OF the Public
Utilities Act, (R.S.N.L. 1990, Chapter P-47),
(the “Act”); and

IN THE MATTER OF a general rate
application (the Application) by
Newfoundland Power Inc.
(Newfoundland Power) to establish
customer electricity rates for 2013 and 2014.

TO: The Board of Commissioners of Public Utilities (the Board)

INTERVENOR’S SUBMISSION

1. Hydro is a corporation continued and existing under the *Hydro Corporation Act, 2007*, is a public utility within the meaning of the Act and is subject to the provisions of the *Electrical Power Control Act, 1994*.
2. The Applicant, Newfoundland Power, Hydro’s largest customer and the primary distribution electrical utility on the Island of Newfoundland, purchases from Hydro approximately 90% of the energy that it sells to its customers.
3. Hydro’s rates for sales to non-Industrial Island Interconnected customers and to its isolated customers are the same rates, or are based upon the rates, set by this Board for Newfoundland Power’s customers.
4. The regulatory principles used in ratemaking for Newfoundland Power are relevant to Hydro because many issues and principles apply equally to both utilities.
5. Hydro is not advocating any specific disposition of the Application at this time.

6. Hydro is requesting Intervenor status for the purpose of obtaining all information filed in the proceeding and so is proposing to participate in a limited fashion to file Requests for Information and to attend technical conferences. Should Hydro become aware of issues or information that require Hydro to participate in the proceeding in a more active capacity, Hydro will apply to the Board for leave to expand the scope of its intervention.

Dated at St. John's, in the Province of Newfoundland and Labrador, this 9th day of October, 2012.
