

1 **Q. [ELG] – Regarding the statement at the bottom of page 15 of Mr. Wiedmayer’s**
2 **rebuttal testimony that making dramatic, major, or significant changes requires**
3 **overwhelming evidence, please provide how often Gannett Fleming previously**
4 **proposed dramatic, major, or significant changes in life or net salvage parameters in**
5 **other proceedings.**

6
7 A. Gannett Fleming does not maintain a list of every instance in which it makes significant
8 changes to life or net salvage parameters. However, as indicated in the response to
9 Request for Information CA-NP-627, such a change normally would be accompanied by
10 significant evidence to support both the estimate made and the reason why a more
11 gradual change is not more appropriate. The evidence could be found either in the
12 historical data or in information external to the data, or possibly in both.
