

1 Q. Please indicate what difference there is, if any, in a rate per kWh and a rate per kW
2 per hour.

3

4

5 A. A rate per kWh and a rate per kW per hour are effectively the same in that they are
6 both rates for an amount of energy delivered or consumed. In the request for
7 capacity assistance, the variable rate will apply to the kW of capacity assistance
8 requested times the number of hours for the request.
