

1 Q. Do you have any reason to believe that all of your gas turbines will not be operable
2 by December 1, 2014. If so, which turbine(s) and why.

3

4

5 A. At the present time, Hydro has no reason to believe that all its currently installed
6 gas turbines will not be operable by December 1, 2014.

7

8 The Stephenville Gas Turbine has been unavailable since November 10, 2014 and
9 repairs are presently scheduled to be completed in the next two weeks to facilitate
10 a return to service for December 1, 2014.

11

12 With respect to the new CT currently being installed at Holyrood, the majority of
13 the project has been completed, but there is work that remains to be done and
14 Hydro will have a firmer sense in early December of when the unit will be online
15 with first power. Hydro will continue to report regularly on the progress of the
16 project.
