

1 Q. Please confirm that Vale will be in control of the timing of the work.

2

3

4 A. Hydro is expecting to complete this work within a short period of time upon
5 approval from the Public Utilities Board, as this transformer is currently out of
6 service, and it is Hydro's intent to restore the transformer N-1 reliability for
7 customers served from this Terminal Station, Vale and Praxair, as soon as possible.

8 Hydro is cognizant of customer's interest in the schedule and will work with the

9 customers and the original equipment manufacturer in coordinating this work.
