

1 Q. The project schedule provided on page 13 of the August 2015 report identifies
2 November 2015 as a proposed date for the return of the refurbished engine to
3 service. What implications does the November return to service date have on
4 Hydro's winter readiness planning for the upcoming winter season?

5

6

7 A. Assuming tender award in early October, it is estimated that the engine will be
8 returned to service prior to December 1, 2015. Thus it is expected that this project
9 will have minimal impact on Hydro's winter readiness plan.
