

1 Q. **Projects over \$200,000 but less than \$500,000**

2 Upgrade Quarry Brook Dam Equipment, page D-2:

3 Has Hydro taken any steps to upgrade the signs and/or fencing installed on the dam
4 in the early 1990's?

5

6

7 A. Hydro has not upgraded the signs or fencing but has maintained the signs and
8 fencing installed on the dam in the early 1990's. Dam inspections have included
9 observed conditions of the fencing and signage during each inspection. In 2009 it
10 was observed that the existing signage needed to be replaced. This action was
11 carried out and documented in the 2010 inspection. The fence has been
12 continuously observed as being in good condition with no signs of rust.

13

14 Fencing referred to in this proposal is additional fencing to provide increased public
15 safety measures to detract public interaction with the reservoir. Replacement and
16 additional signage is proposed to provide public safety signs that meet current CDA
17 "public safety around dams" guidelines.
