
1 Q. **Project C-48: Replace Accommodations and Septic System – Ebbegungaeg**

2 Has Hydro considered whether a six bedroom unit is required or whether a smaller
3 accommodations camp, with double occupancy in some bedrooms (if required),
4 would suffice? If yes, are details of the cost of such smaller accommodations camp
5 available?

6

7

8 A. Hydro has determined that six bedrooms are required to provide adequate space to
9 meet the crew requirements during annual maintenance activities. This aligns with
10 the Alberta and BC standards and modern accommodations throughout the
11 Province as referenced in CA-NLH-066. A cost estimate for accommodations
12 containing fewer rooms with double occupancy was not prepared.
