

1 Q. **Reference: Upgrade Distribution Systems, Volume I, Section C, Page C-33**

2 Provide the list of Distribution Feeders to be upgraded in 2015.

3

4

5 A. The Upgrade Distribution Systems – All Service Areas budget covers off unforeseen

6 replacement of equipment such as poles, cribs, anchors, conductor and line

7 hardware as a result of a sudden failure or if the condition warrants immediate

8 attention. Items that are replaced under this budget are identified in the same

9 calendar year. Items that are deteriorated and where replacement can be delayed

10 are identified and lumped into separate capital proposals and placed in the five or

11 20 year plans as stand alone projects. Therefore, it is difficult to predict on what

12 feeders the 2015 upgrading budget will be spent on. However, based on historical

13 trends, upgrade work is carried out on the vast majority of distribution feeders each

14 year.
