2 *“Hydro is proposing to undertake significant rehabilitation at each of its mini*
3 *hydro projects at Snook’s Arm and Venams Bight over the next three years in*
4 *order to continue to provide least cost and reliable power.”*

5 Provide the economic analysis completed by Hydro that confirms that the
6 significant rehabilitation proposed for Snook’s Arm and Venams Bight will provide
7 least cost power into the future.

8

9

10 A. Hydro will only propose rehabilitation at each of its mini hydro projects at Snook’s
11 Arm and Venam’s Bight if the projects are consistent with the provision of least cost
12 and reliable power. Hydro is currently applying to study the options of status quo,
13 refurbishment, replacement or decommissioning so it can evaluate the economic
14 feasibility of Snook’s Arm.
