

1 Q. Reference: Replace Accommodations and Septic System, Volume II, Tab 20,

2 Page 10

3 *“The installation of new modular housing units constructed using improved*
4 *insulating components and a modern building envelope will provide a significantly*
5 *improved dynamic thermal performance and, consequently, result in energy*
6 *savings.”*

7 Please provide details on the current specifications for this \$1,550,800
8 accommodations facility.

9

10

11 A. While not attributed to the primary justification of this project, the new facility will
12 be constructed to provide improved dynamic thermal performance. Improvements
13 to the thermal performance of the facility will, in turn, result in an energy savings.
14 The specification for the new Ebbegunbaeg accommodations has yet to be
15 developed.
