

1 Q. Reference: Upgrade Circuit Breakers, Volume II, Tab 13, Appendix F, Page F6

2 *“The accelerated air blast circuit breaker replacement program is designed to be*
3 *implemented in two three-year phases. For each phase, a multi-year contract (3*
4 *years) will be issued for supply and installation of breakers.”*

5 Does Hydro intend to follow the recommendation of its consultant AMEC with
6 respect to implementing the air blast circuit breaker replacement program in two 3-
7 year phases? If so, why is Hydro not seeking approval at this time for a 3-year
8 multi-year project? If not, why not?

9
10

11 A. Hydro at this time is requesting approval of a two-year, multi-year project but will
12 evaluate its requirements for project terms for circuit breakers in the future.
