

1 Q. Reference: Upgrade Circuit Breakers, Volume II, Tab 13, Appendix F, Page F6
2 *“The accelerated air blast circuit breaker replacement program is designed to be*
3 *implemented in two three-year phases. For each phase, a multi-year contract (3*
4 *years) will be issued for supply and installation of breakers.”*

5 Is it Hydro’s intention to enter into a 3-year contract for the supply and installation
6 of breakers as indicated by AMEC? If so, how does Hydro intend to address the
7 requirement for prior Board approval of the 2017 capital expenditures?

8

9

10 A. Please refer to Hydro’s response to NP-NLH-060.
