

1 Q. C-53; Volume II, Tab 22: Replace Unit 2038 – Mary’s Harbour

2 What is meant by “*isolation and icing operational issues with cooling systems*” as  
3 stated on page 4.

4

5

6 A. “*Isolation operational issues*” refers to a lack of flexibility in the existing cooling  
7 system configuration which limits the capability to isolate component equipment  
8 such as radiators and heat exchangers to enable completion of maintenance  
9 activities which would permit continued operation of the cooling system.

10

11 “*Icing operational issues*” refers to intermittent icing problems that may occur  
12 during stormy winter conditions which can result in radiator blockages and fan  
13 damage.
