

1 Q. Hydro states in Footnote 1 Page 4 "*Commissioning a condition assessment; and*
2 *developing a plan for equipment replacement in the Wabush Terminal Station will*
3 *be a priority for Hydro after assuming ownership.*" Does Hydro anticipate this
4 condition assessment and plan development to form part of its 2017 capital plan? If
5 no, when is it anticipated to occur?

6
7
8 A. While Hydro has commenced a review of its capital requirements for this
9 equipment, a condition assessment has not been fully developed. As such, the costs
10 were not included in Hydro's 2017 Capital Plan. This work will be revisited and
11 completed upon Hydro receiving PUB approval of the transfer of these assets and
12 finalizing the agreement of purchase and sale of the assets. Therefore, provided the
13 transfer occurs in the latter part of 2016, Hydro will develop a supplemental capital
14 application to enable this assessment to be completed in 2017.
