1   Q.   **Tab E – Projects Over $50,000 and Less Than $200,000: p. E-56 – Replace Video**

2   **Conferencing Bridge, Hydro Place**

3   What was the anticipated lifespan of the system when it was put in?

4

5

6   A.   The Server lifecycle plan is five to six years and the video conferencing system is

7   essentially a group of servers running proprietary Polycom software. Further, the

8   expected lifespan of the system was for as long as the vendor would support the

9   system, and the vendor no longer supports the system.
