
1 Q. **Volume II, Tab 8 –Upgrade Distribution Systems**

2 What is Hydro’s inventory of on-hand spares for the line components identified for
3 replacement?

4

5

6 A. Hydro maintains a small inventory of on-hand quantities to be used as on-hand
7 spares for many frequent-use line components. This inventory is for emergency
8 installation purposes. These items are held in regional stores locations in Bishop’s
9 Falls, Happy Valley-Goose Bay, and Port Saunders, to be used in the surrounding
10 regions. Hydro also has smaller stores locations which maintain a much smaller
11 inventory of hardware to supply remote areas. Each warehouse maintains their
12 own on-hand quantities based on local historical requirements.
