

1 Q. **Project D-419: Upgrade Server Technology Program - Hydro Place**

2 With reference to the Report at Volume I, Tab D, pages D-420 to D-421, under the
3 subheading “Summary of the Physical Asset Hardware Status”, Hydro has identified
4 four priority levels for Server Hardware Replacement and indicated specific
5 hardware that corresponds to these priority levels: Level 0; Level I; Level II; and
6 Level III. Of the noted priority levels, which is Hydro seeking server upgrades for as
7 part of the 2016 Capital Budget Application? For example, are all noted priority
8 levels to be upgraded, or are only specific priority levels requiring upgrades?

9

10

11 A. In 2016, Hydro is seeking server equipment upgrades in three specific priority
12 levels, which are as follows:

- 13 • 13 assets from Level I;
- 14 • One asset from Level II; and
- 15 • Two assets from Level III.
