

1 Q. Consumer Question: If Emera is taking 1.0 TWh throughout the next 35 years, with
2 no energy charge, then will this factor alone increase the cost to consumers on the
3 Island, who will be paying for 4.9 TWh and will have access to only 3.9 TWh and
4 initially will use only 2.0 TWh?

5

6

7 A. The information requested does not assist consideration of the Reference Question.
8 Consistent with the Reference Question and the Terms of Reference, Nalcor's
9 analyses are based on Muskrat Falls supplying Island needs only. Costs and benefits
10 associated with the proposed arrangements with Emera will be addressed by Nalcor
11 and its shareholder, the Government of Newfoundland and Labrador, prior to
12 Project Sanction.
