

1 Q. Consumer Question: The EMERA term sheet references the "NS Block of Power"
2 which equates to 980 GWhr which is provided in exchange for construction of the
3 Maritime Link, the enabler of additional power sales. However when considering
4 the Muskrat Falls power purchase profile, assumed in the interconnected island
5 case, there is a potential deficiency in total energy observed around 2035. NALCOR
6 are requested to confirm if the EMERA commitment will provide an energy shortfall
7 in the interconnected option?

8

9

10 A. The information requested does not assist consideration of the Reference Question,
11 as neither the Terms of Reference nor the Reference Question addresses matters
12 related to the Emera term sheet.
