

1 Q. Consumer Question: Further to the preamble outlined in CA/KPL-Nalcor-194, to
2 what extent does Hydro Quebec have control over the flow of water from Churchill
3 Falls by virtue of the terms of the 1969 contract?

4

5

6 A. After September 1, 2016, when the renewal provisions of the 1969 contract are in
7 effect, Hydro Quebec's monthly energy entitlement will be the same each month.

8

9 While Hydro Quebec may influence the flow of water from Churchill Falls on a short
10 term basis by adjusting their power on request from Churchill Falls, their monthly
11 energy entitlement will generally be consistent. As a result, the average monthly
12 flow from Churchill Falls is also expected to generally be consistent.
