

1 Q. Consumer Question: What is the sulphur content of fuel currently being used at
2 Holyrood and is a lower sulphur fuel available? If a lower sulphur fuel is available,
3 what is the current price difference between the two?
4

5
6 A. 0.7% sulphur fuel is currently used at Holyrood. 0.3% sulphur fuel is also available.
7 As indicated in Nalcor's response to PUB-Nalcor-20, the price premium for 0.3%
8 versus 0.7% sulphur fuel ranges from 5 to 10 percent higher for the lower sulphur
9 fuel, with 10% more representative of the forecasted long run price premium.
