

1 Q. Consumer Question: Further to CA/KPL-Nalcor-253, given the attested long LIL
2 distance and resulting real power and energy losses to transmit, has
3 MIL/Nalcor/PUB fully examined hvdc transmission optimization of loss versus
4 increased capital offset?

5

6

7 A. The transmission facility optimization has not been fully completed, and the
8 analysis requested in the question will be undertaken by Nalcor and its EPCM
9 consultant during detailed engineering of the Labrador Island Transmission Link.
