

1 Q. Please show the generation profile from Muskrat Falls on a monthly basis for the
2 period of synthetic record used to determine the average generation, in the
3 absence of an agreement with Churchill Falls.
4
5

6 A. The *Electrical Power Control Act, 1994* requires that a water management
7 agreement be in place between facility operators on a river system. By way of
8 Board Order P.U. 8 (2010), the terms of a water management agreement for the
9 Churchill Falls and lower Churchill facilities have been established.
10

11 Since operating Muskrat Falls without a water management agreement is not
12 permissible under provincial legislation, and the terms have been established by the
13 Board, evaluation of production in the absence of a water management agreement
14 does not assist consideration of the Reference Question.
