

- 1 Q. Please provide regression equation results for all models that are used to prepare the load
2 forecast and have not been previously provided in Exhibit 45. This would include regression
3 models for Rural Residential and Rural General Service. Please provide the history and
4 forecast information from 1967-2029, similar to page 7 of Exhibit 45, for all relevant
5 variables used to calculate the regression results.
6
7
- 8 A. Please see Exhibit-62.
