

1

2 Q. What is the justification for the addition of No<sub>x</sub> burners at the Holyrood Plant at an  
3 estimated direct cost of approximately \$19.8 million.

4

5

6 A. The Government of Canada indicated in 2007 that reductions in NO<sub>x</sub> emissions were  
7 to be announced in conjunction with restrictions on greenhouse gas emissions.

8 While new regulations on NO<sub>x</sub> emissions have yet to be enacted, Nalcor considered

9 it prudent to include the cost of low NO<sub>x</sub> burners for Holyrood in its Isolated

10 Scenario for economic analysis.
