

1 Q. What preparations have Nalcor made to ensure capacity and energy requirements  
2 for the Island Interconnected System are met in the event that Muskrat Falls and/or  
3 the HVdc link are delayed or not sanctioned?  
4

5  
6 A. In the event that the Muskrat Falls or the Labrador Island Transmission Link is  
7 materially delayed or not sanctioned, Nalcor will prepare a new generation  
8 expansion plan with updated energy and demand forecasts. The construction  
9 timelines and updated costs of applicable expansion alternatives will be factored  
10 into this analysis.
