

1 Q. What are the total expenditures by Newfoundland and Labrador Hydro and by
2 Nalcor to July 31, 2011 on all studies, analyses and reports undertaken on Muskrat
3 Falls (including the transmission link to the Island) and the Isolated Island Option?
4
5

6 A. Further to Nalcor's response to PUB-Nalcor-130, Nalcor has available expenditure
7 data up to September 30, 2011 related to all work completed to-date for Muskrat
8 Falls and the Labrador-Island Transmission Link, which indicates a total expenditure
9 of \$123.7 million. Note that these values exclude any costs related to the Maritime
10 Link Project.
11

12 Confidential Exhibit CE-68 provides a listing of the expenditures by vendors where
13 incurred cost > \$100k.
14

15 The total expenditures for pre-feasibility and feasibility studies for generation
16 additions associated with the Isolated Island Option are as provided under PUB-
17 Nalcor-7 and amounted to \$5.3 million.
