

1 Q. Using the Muskrat Falls-Labrador-Island Link load forecast, please provide the rate
2 differential by year for the Muskrat Falls Infeed Option, from that obtained using
3 the energy sales from the Isolated Island load forecast.

4

5

6 A. As indicated in Nalcor's response in PUB-Nalcor-88, a common short term forecast
7 is applicable to both alternatives and therefore the rates are as projected in PUB-
8 Nalcor-5.
