

1   **Re Page B-56:**

2   Q.    What would be the anticipated cost, for the next five years, of the installation  
3       of borosilicate tiles to slow corrosion?

4

5

6   A.    Based on the average cost over the past five years, the anticipated cost,  
7       without doing any major upgrading, will be the average of the previous five  
8       years with price escalation, approximately \$200,000 per year.
