2   Q.    Provide copies of Hydro's record of its consultation to date with the  
3       Department of Transportation and Works, including correspondence and  
4       memoranda, regarding this Project.

5

6

7   A.    The following attachments are correspondence of Hydro's consultation to  
8       date with the Department of Transportation and Works:

9

10       1)   E-mail dated March 1, 2007 from an employee with the Department of  
11           Transportation and Works allowing Hydro to construct equipment off-  
12           loading ramps along secondary highways.

13

14       2)   E-mail dated February 26, 2007 from a Hydro employee requesting  
15           permission from the Department of Transportation and Works to  
16           construct equipment off-loading ramps along secondary highways.

17

18       3)   E-mail dated October 17, 2005 from a Hydro employee informing other  
19           Hydro personnel about an upcoming meeting with the Department of  
20           Transportation and Works and the meetings objective.

Subject Re: Transmission Line Equipment Off-Loading Sites

History:

 This message has been replied to and forwarded.

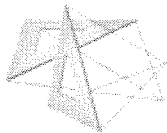

As per our discussion the Department of Transportation and Works will permit on a case by case basis the installation of pull off sites on departmental highways except the TCH. These pull offs must be installed as per our specs and standards and if required must be removed at your cost. Should there be upgrading work in the future any costs associated with these sites will be the responsibility of your firm. Any maintenance must be performed by your forces at your costs. All work is to be coordinated through the appropriate Supt. of Operations for the area.

Dean

As per our telephone conversation could you please send me an e-mail stating that the Transportation and Works Department will allow Newfoundland and Labrador Hydro to install earthen ramps on non- TCH highways to enable them to safely offload their transmission maintenance equipment. This is provided that the sites meet the proper sight distances and any other regulatory requirement that may be required and that these ramps will be constructed to highway standards.

Thanks

Subject Transmission Service Vehicles Highway Safety

Gentlemen

This morning I was in touch with Dean Osmond with Gov. Services Transportation.

We now have a meeting arranged for Friday October 28, 2005 at 9:00am

Location is 6th. Floor Confederation Building

Representing Transportation will be Mr. Gary Gosse and Dean Osmond

Representing Hydro will be Garland Smith, George Lundrigan and Wilber Dyke

The objective of this meeting is to establish a standard acceptable to both parties when improvements are put in place at the road side for Hydro routine maintenance vehicle parking this will include all roads under Transportation jurisdiction.
