

1   **Re Page B-89:**

2   Q.    What alternatives were considered to construction of a new building?

3

4

5   A.    Transporting the workforce by helicopter on a daily basis was considered;  
6         however, due to the severity of the weather in this area there could be many  
7         days when flying would not be feasible. Also, work crews could be stranded  
8         on site if weather conditions deteriorated throughout the day.
