

1 **Re: Page B-217, Safety Hazards Removal, \$252,300**

2 Q. Why is it considered Mandatory to do this project at this time?

3

4

5 A. Many of the deficiencies identified have existed in our facilities for years but
6 were acceptable under legislation and standards which existed when the
7 facilities were constructed. They are not acceptable today under current
8 legislation and standards. As well, other conditions have been identified
9 which, although they may meet the letter of legislation or regulation, pose a
10 real hazard to workers.
