

1 Q. **Re Complete Condition Assessment Phase 2 (p. B-13)**

2 At Tab 5 in the report provided it states at p. 3, "If the plant is required to continue
3 to operate as a base loaded thermal generation station after 2016, a more
4 extensive and comprehensive study will be required to assess the cost of
5 significantly extending the operating life of the systems required for stream
6 production and usage (i.e. boilers, turbines, high energy piping and fuel systems)".
7 In Hydro's assessment, will the plant be required to continue operating as a base
8 loaded thermal generating station after 2016?

9
10

11 A. Hydro is presently not in a position to state the future requirements for the
12 Holyrood Thermal Generating Station.
