

1 Q. **Re Complete Condition Assessment Phase 2**

2 Further to the previous question, if Hydro is not presently in a position to state
3 whether the plant will be required to continue operating as a base loaded thermal
4 generating station after 2016, when does Hydro expect to be in a position to make
5 that determination?

6

7

8 A. As stated in the Generation Planning Issues 2010 July Update, Hydro will need to
9 make a decision regarding future generating supply by the end of 2010. This
10 decision will clarify the future requirements for the Holyrood Thermal Generating
11 Station.
