

1    Q.    **Re Complete Condition Assessment Phase 2**

2            Given the stated purposes of the Phase 1 and Phase 2 investigation and reports,  
3            what is the anticipated purpose and scope of any Phase 3 report?

4

5

6    A.    Depending on the investigation results from Phase 2, Phase 3 of the condition  
7            assessment and life extension program could include Level II condition assessment  
8            of the generation equipment at Holyrood and/or completion of the recommended  
9            asset refurbishment tasks which will be identified during the Phase 2 study and are  
10          necessary to extend the plant's useful life reliably into the future. Further asset  
11          refurbishments identified during the Phase 2 condition assessment project will be  
12          completed under a future capital program.
