

1 Q. **Re Overhaul Gas Turbine (Holyrood) p. B-15**

2 At Tab 6 of the report it indicates that each week the Holyrood gas turbine plant
3 undergoes a 15 minute operational test to verify its availability for its black start
4 function. Have there been any occasions over the last two years that Hydro was not
5 able to verify its availability for black start function? If so, what was the cause of the
6 unavailability?

7

8

9 A. Please see response to IC-NLH-26.
