

1    Q.    **Re: Project B-7 Refurbishment of Marine Terminal**

2            At page B15 of Appendix B, Hatch recommends the installation of a laser sensor,  
3            display and recording system, to assist Hydro to control and record vessel velocities.  
4            Has this recommendation been implemented? What was or would be the cost of  
5            implementing this recommendation?

6

7

8    A.    The recommendation to install a laser sensor display and recording system to assist  
9            Hydro in the control and recording of vessel approach velocities is included in the  
10           budgetary estimate for this project. It is estimated that this system will cost  
11           \$110,000 to implement.
