

1 **Q. Re: B-7, Upgrade Marine Terminal – Holyrood \$5,859,600 in 2012**

2 Has Hatch completed the investigation and analysis of installing a quick coupler
3 release to the existing loading arms referred to on page B25?

4

5

6 **A.** Hatch has not completed the investigation and analysis of installing a quick coupler
7 release to the existing loading arms referred to on page B52, as there was limited
8 time to complete a detailed analysis at the report generation stage. The estimated
9 engineering cost for the Vessel Approach/Loading Arms portion of the work
10 includes the completion of a detailed investigation and analysis during the project
11 design phase.
