

1 Q. **C-10, Replace Fuel Storage Tanks, St. Lewis, \$465,100**

2 With the change in delivery schedule to a monthly delivery, is there any risk that  
3 there will be a shortage of fuel at some point in the future?  
4

5

6 A. The fuel supplier has approximately 3,000,000 litres of storage near St. Lewis in Port  
7 Hope Simpson which is accessible by road. The fuel contract requires that the  
8 supplier have sufficient supply of fuel to supply all the needs of the sites covered by  
9 the contract.  
10

11 Additionally, with St. Lewis now accessible by road, fuel can be obtained from any  
12 storage site from Goose Bay to Southern Labrador.  
13

14 There is little or no risk of a fuel shortage for the St. Lewis plant due to the  
15 downsizing of the site fuel storage.
