

1 Q. **C-10, Replace Fuel Storage Tanks, St. Lewis, \$465,100**

2 What, specifically, is the commitment of Hydro with regard to the contract with the
3 supplier for the supply of fuel to St. Lewis?

4

5

6 A. Hydro's commitment is to receive fuel based on estimated quantities for the price
7 stated in the contract. The present contract was issued in 2009 and provides for
8 delivery of 2,700,000 litres (over five years) to St. Lewis. Hydro's commitment is to
9 have 409,140 litres of storage available. Presently, it is estimated that the yearly
10 consumption is approximately 522,000 litres.

11

12 The only change to the contract commitment resulting from this proposal is to
13 reduce the available storage to 90,000 litres. This will change the supplier's delivery
14 schedule to more frequent deliveries.
