

1 Q. **C-205, Remove Safety Hazards \$249,100**

2 What is the process used and the criteria applied to determine which projects are
3 undertaken in this capital project from those identified in the Safe Work
4 Observation Program?

5

6

7 A. SWOP items are completed by employees, contractors and others who access
8 Hydro facilities when a safety hazard is identified. Each area is responsible for
9 reviewing the SWOP's and taking actions warranted to mitigate risk. Often this is an
10 operating or procedure change, a communication item or an operating budget item.
11 When it is concluded that this is a capital item, the item is costed and put forward
12 for consideration under this category. These requests are reviewed and if
13 warranted, the funding is approved by the Vice President of Regulated Operations
14 and the Vice President of Project Execution and Technical Services.
