

1 Q. **Page E-9, New 25 kV Terminal Station – Labrador City, \$3,507,000**

2 Please provide a detailed explanation of the work that will be undertaken in 2012.

3

4

5 A. The 2011 work includes the delivery and assembly of the four power transformers;  
6 the installation of the majority of a fibre-optic cable link between the existing  
7 Wabush Terminal Station, new Quartzite Station and new Vanier Station; the  
8 completion of the majority of the civil upgrades to both new stations; the delivery  
9 and installation of the Quartzite terminal station building; and the installation of the  
10 Quartzite electrical equipment.

11

12 The 2012 work includes the commissioning of the Quartzite Station; the installation  
13 of the remainder of the fibre-optic cable; the delivery and installation of the Vanier  
14 terminal station building; the installation of the Vanier electrical equipment; the  
15 commissioning of the Vanier Station; and the completion of the remaining civil  
16 upgrades.
